4. Issues

#1 [Critical] 500 global: @apply border-border vs plugin Tailwind v4. postcss.config.mjs:2 · src/styles/globals.css:79 · package.json:56. Reproduce: dev en 3100 → abrir / → 500 ModuleBuildError. Evidencia: qa-results.json + 24 shots.

#2 [High] Backend backend.lab-ux.site inaccesible (fetch failed). Tras el fix verificar skeletons/mocks vs datos reales.

#3 [Medium] Sin baseline visual — este set de 24 es el primer baseline (del estado 500).

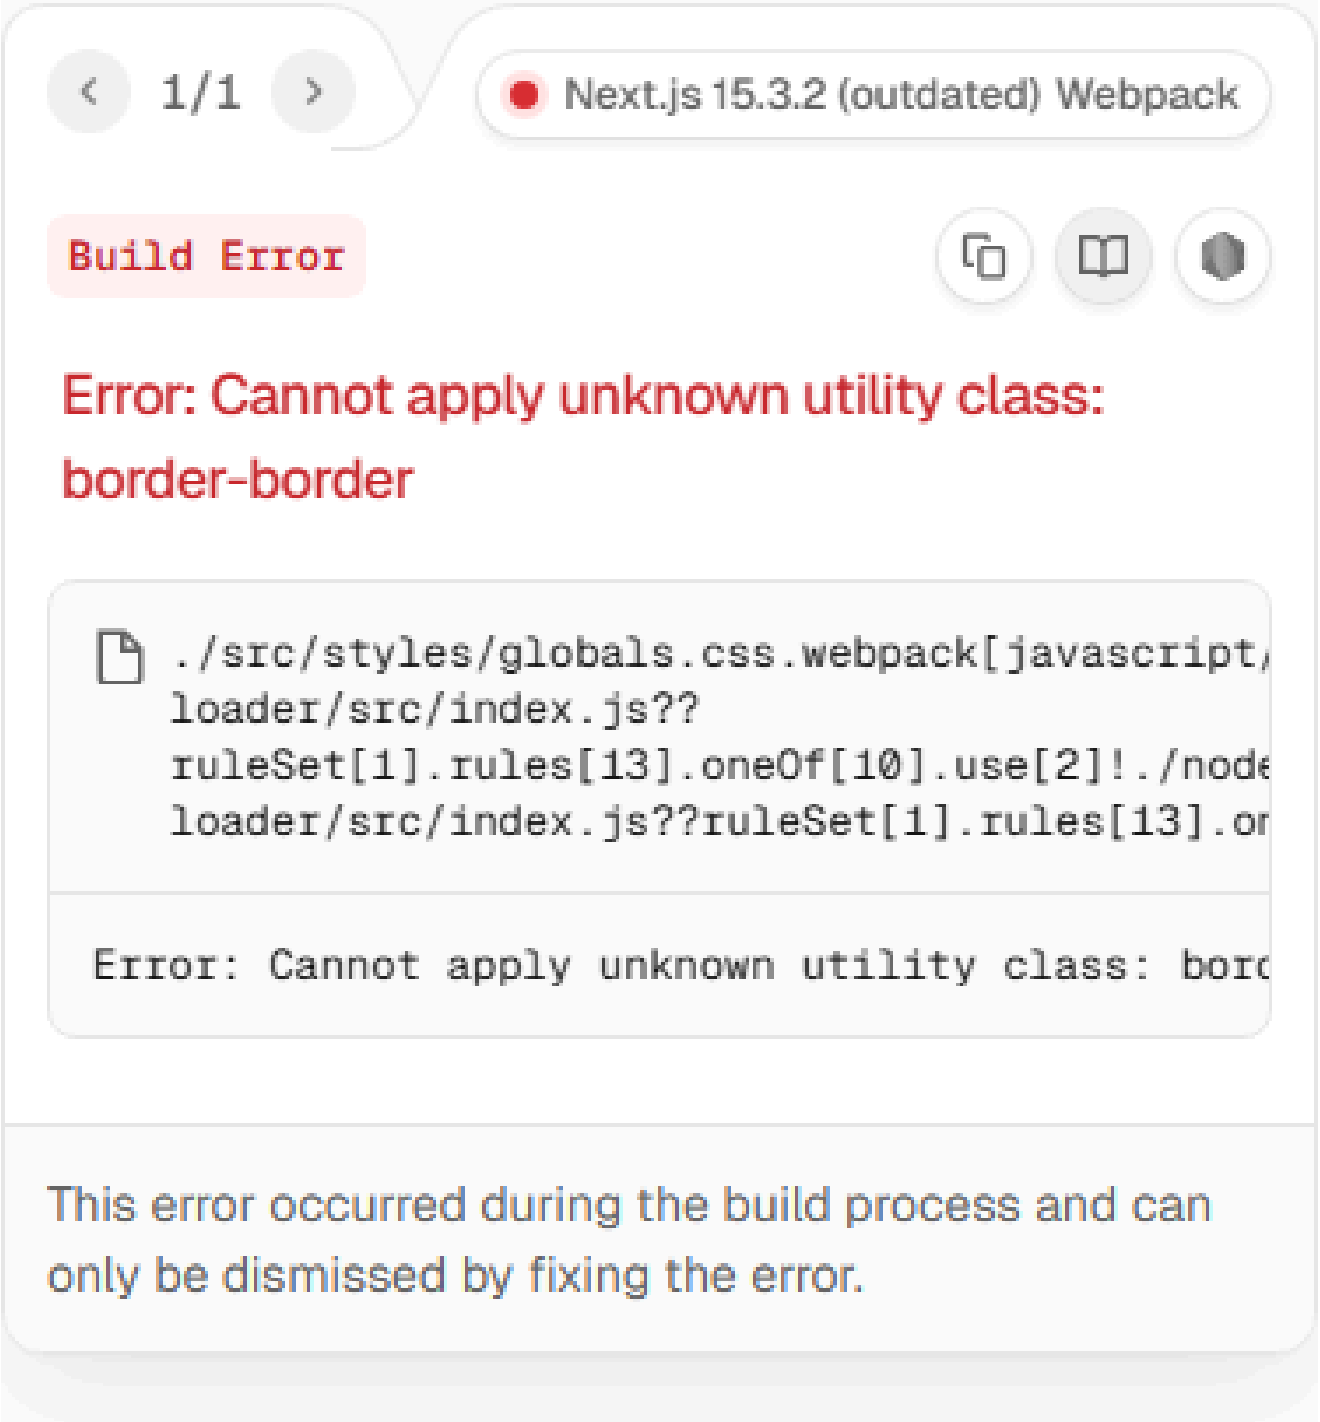

#4 [Medium] Ruido entorno: @next/swc-win32-x64-msvc inválido + warning Deprecated API x24. Reinstalar node_modules.

#5 [Low] a11y manual diferida: foco #CA8A04, landmarks, aria-live glosario, contraste AA, teclado end-to-end.

#6 [Low] Tech-debt registrado (layouts html anidados, auth localStorage, typo constans/, components.json) — ver AGENTS.md §9.
